WINDSOR, N.S.

TORONTO, ONT.

TO THE TRADE.

In issuing the Seventh Series of our Illustrated Catalogue, we consider it will be advantageous to our patrons to depart from our usual custom of publishing a separate Price-List, and have therefore combined it with this issue, based upon the **LONG-PRICED SYSTEM THROUGHOUT**, for easy reference and use.

We would particularly call your attention to the many **NEW, ORIGINAL, AND HANDSOME PATTERNS** introduced herein, suited to the wants of **EVERY SECTION OF THE DOMINION**, embodying all recent improvements, carefully studied in all details, appearance, and practical use.

Our facilities for execution and delivery of goods are unrivalled, and our reputation of over thirty-two years' standing, for **STRICTLY FIRST-CLASS WORK**, will, we are assured, be greatly enhanced by the present productions.

In asking this your careful perusal, we beg very respectfully to thank our existing customers for the past most liberal support, and solicit a large share of your valued orders for the coming season.

WINDSOR FOUNDRY COMPANY.

, ONT.

WINDSOR, N.S.

TORONTO, ONT.

TERMS.

Nett at four months from end of month in which goods are dispatched,

Six per cent discount for cash, if paid within thirty days from first of month following date of invoice: Four per cent. within sixty days, or Two per cent. within ninety days.

Interest at the rate of Eight per cent. per annum will be charged on renewals and over-due accounts.

Freight will be allowed from the amount of invoice, to the nearest railway station, or steam boat landing, on Stoves, Ranges and Hollow-ware, in lots exceeding 200 pounds.

Unless otherwise ordered, we will ship all goods at our risk, to obtain lowest rates, and our responsibility ceases after obtaining the carrier's receipt, "shipped in good order."

All claims for deductions must be made within seven days after the goods are received.

Goods shipped during the months of July, August and September, will date as and from October 1st, following.

ATTRACTIVE and EFFICIENT ADVERTISING
MATTER, PRINTING BLOCKS, SHOW CARDS, &c.,
will be supplied on application.

"WINDSOR FOUNDRY COMPANY."

WINDSOR, N.S.

TORONTO, ONT.

WINDSOR "EMPRESS" RANGE.

This is an ENTIRELY NEW and handsomely designed Range, introduced for the first time THIS SEASON. It is composed of the latest style, most perfectly fitted, made from new iron by skilled mechanics, fully nickle trimmed, with tile centre, heavy and substantial metal.

Full sized flues and ovens are provided, the special appliance for ventilating oven with heated air, supplying a great desideratum. This hot air is taken into oven under the fire-box, and circulates through, carrying off all odors from baking. This is an entirely new application of this valuable principle, rendering it the "*Best Working Range made,*" as it saves more than half the usual shrinkage in meat cooked in a close oven, and renders also the food much more palatable.

Foot-lever openers to oven doors. Famous Dock Ash-grate, the best known. Very large reservoir with our special flue system, so that the water is raised to boiling point in the shortest time possible. The covers and centre pieces all have our ventilated linings, and cannot warp or crack, making them practically indestructible.

Has a deep ash-pit and large ash-pan. Outside oven-shelf, and the base, the highest known. Best flue system and best shaped oven, in fact we predict it the "*Finest Range possible to make,*" as it has every convenience and useful contrivance that have been added to any range, and can be fitted and supplied with complete set of linings, for burning wood when so ordered.

It will last a life time, and will always work in any kind of chimney.

and the use of fuel.

Formerly large Ovens are introduced, with Shells for fast cooking. Check draft and improved Woods of Hub. Towel driers.

It excels as a boiler, and has given general satisfaction, and most popular when introduced.

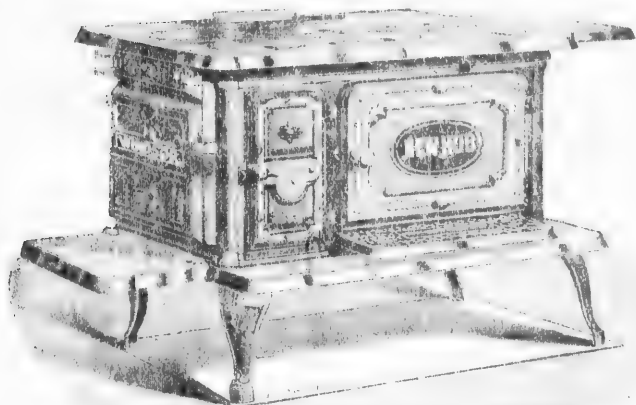

The best constructed Reservoirs are supplied, by which the whole circulation of heat is made to pass in it, rapidly raising the water to boiling point, or checked by the simple turn of damper. This tank can easily be removed for cleaning or repairing purposes.

WINDSOR "DELMONICO" RANGE.

Patented 1st March 1900.

The object of this invention is to provide a simple and effective means of controlling the flow of water in a stream or river, and of preventing the same from overflowing its banks.

The invention consists in a range of adjustable gates or dams, which may be raised or lowered as required, and which are provided with a means of locking them in position.

The Range is constructed of heavy iron plates, which are bolted together, and are provided with a means of locking them in position. The plates are arranged in a series, and may be raised or lowered as required, and are provided with a means of locking them in position.

It is provided with a means of locking them in position, and is provided with a means of locking them in position. The invention is provided with a means of locking them in position, and is provided with a means of locking them in position.

By removing the two covers and the two plates, the box is closed, and the water is prevented from overflowing its banks. The invention is provided with a means of locking them in position, and is provided with a means of locking them in position.

WINDSOR "PRINCE"

For Hard Coal or Wood.

For Hard Coal or Wood.

This is a New Stove with a large, tiled front panel, tiled sides and tiled back. It has a large oven door, a large fire door, a large fire opening, a large fire sliding-hearth, a deep ash-tray and a deep fire-brick fire-lining. Anti-Warping Centre. Tiled, elegant Cabinet Base. Towel-bar. Very complete.

We consider we are justified in contending there is nothing to equal this Stove in Style and Value.

WINDSOR "IMPERIAL."

SURFACE-BURNER.

In presenting our new Surface-Burner this season, we are satisfied that it will take the leading rank among stoves of its kind. As every detail in construction, mounting, smoothness of castings and beauty of design, as well as its merits as a heater, are carefully provided for. We have endeavoured to embody every improvement that would add to its success in a practical, as well as ornamental way.

In many Stoves of this class, the flue does not extend around the base, but simply on the sides, and connects thence directly with back-flue, while in the Windsor "Imperial" the flues go down between the lining and sheet-iron, around the entire body of Stove, to a Double-bottom in the Base, and thence by a Return-flue to Exit. This arrangement gives the full benefit of radiation in front, as well as at back, a very important point in purchasing a Surface-Burner Heating Stove.

The ornamental features of this Stove, aside from the Art Castings, consist of elaborate Tile in connection with Nickel, viz. three Tiles in the Urn, two in Mica Door-jamb, and one large oval Tile with Nickel Panel over Door, and Nickel Foot-rails.

Each Stove is provided with a spacious Oven on top, with Rack, a very convenient arrangement for Heating Water, Baking, etc.

The Ash-pan is extremely large, (an important feature). The cleaning arrangement perfect, consisting of Flue-plate under Ash-pan, and Check-dampers both front and back.

Don't overlook this SUPERB STOVE, as in pushing it, you will be certain to get the NEWEST IN DESIGN, RICH AND STRIKING IN ORNAMENTATION, A MOST POWERFUL HEATER, EASILY CONTROLLED, ECONOMICAL IN FUEL, AND A STOVE BOUND TO LEAD ALL OTHERS.

TOBACCO CO. LTD.

WINDSOR "MODEL"

The Windsor "Model" Case

The Windsor "Model" cigarette case is a masterpiece of craftsmanship. It is made of the finest materials and is decorated with the most intricate patterns. The case is designed to protect your cigarettes from dust and moisture, while also adding a touch of elegance to your collection. It is a true work of art, and a must-have for any discerning smoker.

For a full description of the Windsor "Model" cigarette case, please refer to the accompanying literature.

TORONTO, ONT.

WINDSOR "HUB" SINK.

PATENT SANITARY TRAP AND SELF-LOCKING COUPLINGS.

The construction of the Trap prevents the accumulation of any sediment or solid substances and is practically self-cleaning, making it entirely free from the unpleasant odors emanating from the ordinary Trap.

It is never necessary to lift the Strainer, for the Scouring-toggle thoroughly cleans every portion of the Bowl or Trap. With this Trap, no sediment or grease can possibly collect on any of its surfaces if the Strainer is revolved occasionally. This is true of no other Trap made.

The Trap is held firmly in place by a Brass Screw, so that servants cannot remove it and carelessly lose spoons, forks, etc., down the pipe.

The Pipe can be quickly connected without soldering, by our Improved Coupling, making a perfect joint.

THE "PROVIDENCE"

PATENT POWER CAPSTAN.

We possess the exclusive right, for Canada to make the celebrated American Providence Windlasses and Capstans, of which we hold complete patterns, a few of which we illustrate herein, but a full catalogue with details and latest list of vessels equipped, will be supplied on application.

In addition to the superior workmanship of these justly celebrated Capstans, which meet the approval of all nautical men, it has one feature which none other has, and it is very important, viz.:—Both the inside and outside pawls take the strain, thus furnishing double security against breakage, and relieving the men on the bars from danger.

Prices of above and Simple or Steam Capstans furnished on application.
